### **DETAILED ACTION**

1. According to paper filed on July 29, 2008, the applicants have canceled claims 1-24 and furthermore, have added new claims 25-38.
2. Claims 25-38 are now pending in the application.

### ***Response to Arguments***

3. Applicant's arguments filed on July 29, 2008 have been fully considered but they are not persuasive regarding enablement rejection of instant claims 33-38 and obviousness rejection of instant claims 25-38. In regard to enablement rejection for methods of treatment, the applicants mention few references in their response in support of enablement. However, they did not provide these references for proper evaluation of enablement issues. In regard to obviousness rejection, the applicants admit that it would have been obvious to prepare optically active compounds but the presence of optically active compounds that show selective blocking action against T-type calcium channel could not have been expected from a combination of the cited references. The examiner does not agree with the applicants arguments. First of all, the instant claims 25-32 are directed to compounds and not method of inhibiting T-type calcium channels. Secondly, the pharmaceutical utility of the compounds of the cited references is well established and therefore, inhibition of T-type calcium channels will be inherent. Thirdly, Masumiya's reference teaches the expected benefit of decreased heart rate when bradycardia is mainly achieved by prolongation of the diastolic period as observed with T-type calcium channel antagonists. Therefore, it would have been obvious to one skilled in the art to

prepare optically active form of efonidipine which selectively inhibits T-type calcium channel with reasonable expectation of success.

***Conclusion***

4. Rejection of claims 25-38 under 35 U.S.C. 103(a) is maintained for the reasons of record.

5. The enablement rejection of instant claims 33-38 under 35 U.S.C. 112, first paragraph is maintained for the reasons of record.

**NEW GROUNDS OF REJECTION**

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 33-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claims 33-35, the term ----- compound comprising a T-type calcium channel blocker ----- is indefinite since the structure of the compound is not defined. Is this compound different from compound of formula (1)?

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
